

AMBARISH DASH

Software Development Engineer in Test (SDET/QA) | QA Automation | FOSS/OSS Compliance | GenAI POCs

+91-8792102302 | dash.ambarish@outlook.com | India

PROFILE

FOSS/OSS Compliance and QA Automation Professional with 9.5+ years of experience across payment, financial, insurance, ecommerce, and telecom domains. Strong in web, mobile, API, regression, functional, exploratory, and CI-driven automation. Experienced with FOSS/OSS component review, license-compliance triage, and open-source vulnerability scanning using Black Duck Hub, Protex, CodeCenter, and Veracode. Worked on LLM, GenAI, and generative AI-assisted workflows using prompt engineering and MCP POCs from a FOSS perspective.

CORE SKILLS

Automation: Selenium, Playwright, CodeceptJS, Protractor, Cucumber

API and Performance: RestAssured, Postman, JMeter

Mobile and Cross-browser: Appium, BrowserStack

Programming: Core Java, JavaScript, Node.js

CI and Test Management: Jenkins, JIRA, QTest, TestRail, Quality Center

FOSS/AppSec: Black Duck Hub, Protex, CodeCenter, Veracode, SCA, OSS compliance

Monitoring and Web Security: Datadog APM, Akamai BOT mitigation

AI-assisted Workflows: LLM, GenAI, prompt engineering, MCP POCs

PROFESSIONAL EXPERIENCE

Operative India Pvt. Ltd.

2022 - Present

Senior QA Engineer

Project: AOS Reports

- Worked on backlogs, new automation scripts, and regression failure fixes using Selenium WebDriver.
- Built a Playwright POC with JavaScript and developed the automation framework from scratch.
- Reduced regression testing time by 40% by integrating API test automation into Jenkins CI pipelines.
- Developed automation scripts using RestAssured with Java for backend validation.
- Performed FOSS/OSS component review for application codebases, focusing on license obligations and open-source vulnerability risk.
- Supported OSS usage approval and remediation follow-up by coordinating with engineering teams and aligning with compliance policy.
- Worked on LLM, GenAI, and generative AI-assisted workflows using prompt engineering and MCP POCs from a FOSS perspective for OSS component review, license-compliance triage, and vulnerability analysis.
- Used Monetate for personalization validation, Akamai for BOT mitigation, and Datadog APM for JMeter load-test monitoring.
- Designed mobile automation suites using Appium and implemented cross-browser testing using BrowserStack and Playwright.
- Developed CodeceptJS automated test suites for reliable and scalable web test coverage.

FICO (Fair Isaac)

2019 - 2022

Senior QA Engineer

Project: OM (Origination Manager)

- Developed end-to-end test automation frameworks using Selenium and Protractor for web applications.
- Automated API testing using RestAssured for comprehensive backend validation.
- Developed automated database testing solutions to validate data integrity, performance, and functionality.
- Integrated Appium tests into CI pipelines using Jenkins or Travis CI.
- Reviewed OSS/FOSS and third-party components for license compatibility, compliance obligations, and vulnerability risks.
- Worked with teams to collect OSS audit inputs, track open-source risks, and support remediation planning.
- Performed FOSS identification and license-compatibility checks for open-source components used in application codebases.
- Coordinated with development teams to prioritize remediation of vulnerable or non-compliant OSS components.
- Maintained regression and smoke automation suites, monitored Jenkins executions, and shared test status with stakeholders.
- Prepared test execution reports and defect metrics using QTest/TestRail to improve release visibility and decision-making.
- Debugged test failures and identified issues within test scripts or configurations.
- Used Cucumber for BDD automation integrated with Selenium, RestAssured, and other end-to-end testing tools.

PROFESSIONAL EXPERIENCE CONTINUED

LTI (Larsen & Toubro Infotech)

2017 - 2019

Senior Test Engineer

Project: Mercer PE (Project Enhance)

- Extensively worked on API automation and Postman for backend validation.
- Identified scalability issues in API infrastructure, contributing to a 50% improvement in response times under high load.
- Developed automation test scripts in Protractor using JavaScript and Node.js for manual test cases.
- Built regression, smoke, and functional automation suites using Protractor and JavaScript.
- Conducted load and performance testing of REST APIs using JMeter to identify and resolve bottlenecks.
- Analyzed Jenkins nightly-run failures, collaborated with development teams on root-cause investigation, and tracked issues through resolution.
- Managed smoke and regression suites in Jenkins and maintained CI testing pipelines for timely build feedback.
- Used QTest and Quality Center for test case management, execution tracking, and defect reporting.

PayPal Pvt Ltd

2015 - 2017

Quality Analyst

Project: AGORA (Amazing Global Ops Research Application)

- Analyzed business requirements and designed test cases, test plans, and test scenarios.
- Automated test cases with Selenium WebDriver using Java and maintained the existing hybrid automation framework.
- Executed manual and automated test cases, logged defects, and provided detailed testing reports.
- Collaborated with developers, product owners, and stakeholders to define test objectives and ensure coverage.
- Participated in sprint planning, daily stand-ups, and retrospectives, sharing testing status, risks, and timeline inputs.
- Used JIRA for defect tracking, user-story management, and sprint planning.

EDUCATION, CERTIFICATION, AWARDS AND LANGUAGES

Education

Master in Computer Application - SRM University, 2010 - 2013

Bachelor in Computer - Sambalpur University, 2007 - 2010

Award

Spot Award for Outstanding Performer at FICO (Fair Isaac)

Certification

AWS Certified Solutions Architect - Associate

Languages

English - Fluent

Hindi - Fluent

Odia - Fluent
